PROFESSIONAL SUMMARY

Software Developer with hands-on experience in ERP integration, C#/.NET APIs, SQL Server and RPA, delivering a multi-country NetSuite rollout from requirements through go-live and hypercare. Redesigned a high-volume transfer order process for 450+ outlets, cutting daily documents from 500+ to under 100. Also a freelance web developer with client websites delivered, and a Bachelor's graduate in Software Systems Development (CGPA 3.98). Seeking a fullstack development role (hybrid); also open to freelance projects.

TECHNICAL SKILLS

Languages: C#, Java, PHP, Python, Kotlin, JavaScript, HTML, CSS, SQL, Solidity, C

Backend & APIs: .NET / ASP.NET, Entity Framework, REST APIs, JSON, OAuth 2.0, Token-Based Authentication (TBA)

Databases: Microsoft SQL Server (SSMS, stored procedures, functions, query tuning), MySQL

ERP & Integration: NetSuite, NetSuite Analytics Data Warehouse (NSAW), Microsoft Dynamics 365 Business Central, system architecture, real-time and batch integration

Automation & AI: UiPath (unattended and attended bots), AI-assisted development (Claude Code, parallel subagents), job scheduling

Frontend: HTML, CSS, JavaScript, Material Design, responsive web design, web hosting and deployment

Tools & Practices: Git, Agile, SIT / UAT support, technical documentation

WORK EXPERIENCE

Software Developer, eco-shop Malaysia Jul 2025 - Present
Segamat, Johor, Malaysia

- Delivered ERP integration and automation for a multi-country NetSuite rollout, working with business users and ERP consultants from requirements through go-live and hypercare.
- Supported technical go-live, keeping daily data stable and tallied between the new and legacy ERP; built multi-country ERP integrations with daily reconciliation.
- Redesigned transaction document flows for 450+ outlets after high document volume broke NetSuite's GL impact calculation: moved routine outlet orders to a custom TO Request form feeding NSAW reporting, and converted daily shipments into standard TOs with direct fulfillment, batched at 500 item lines with outlet codes nested in each line's JSON.
- Cut daily TO documents from 500+ to under 100; load-tested NetSuite with production data cloned across multiple locations.
- Built an integration platform: split the core API into a shared class library and an API layer so all tools share one codebase, plus a developer portal for API user registration, reconciliation and monitoring.
- Built a configurable API caller (a stored procedure supplies the request URL and body; OAuth 2.0 or TBA authentication and sync or async mode set by configuration), a poller for async results, and a job scheduler with retries, timeouts and run history that replaced Windows Task Scheduler.
- Applied AI-assisted development: project context and coding conventions in markdown files, parallel subagents (one implements while the main session plans and reviews), and AI plugins for planning, workflows and UI design.
- Resolved support tickets (user setup, permissions, approval workflows, access issues), worked with the vendor on custom features, and supported UiPath bots after go-live.

Information Technology Intern, eco-shop Malaysia Feb 2025 - Jul 2025
Jementah, Johor, Malaysia

- Supported enterprise-wide digital transformation through API integration and RPA automation, connecting upstream ERP systems with WMS, B2B, POS and legacy ERP.

- Designed and developed C# / .NET APIs (Entity Framework, SQL Server) for master and transactional data, including stock adjustments, transfer orders, purchase returns, inventory transfers, item fulfillment and shipment closures.
- Built JSON request/response handling, token-based authentication and business rule validation across multiple regional ERP systems, supporting real-time REST integration and scheduled batch processing.
- Created and optimized stored procedures and functions, including performance tuning for legacy ERP; implemented error logging and data recovery; wrote SQL scripts in SSMS for validation, reconciliation and reporting.
- Developed UiPath unattended bots for scheduled production runs and attended bots for ad-hoc tasks, using modular components and resolving UI element conflicts so bots ran reliably across environments.
- Supported SIT and UAT in an Agile team, used Git with structured branching, and documented API architecture, RPA workflows, technical SOPs and recovery procedures.

Freelance Web Developer, CGS International Securities Group Mar 2025 - May 2025
Malaysia

- Designed and developed the official ASEAN Investment Challenge 2025 website (aseaninvestmentchallenge.com) with a responsive, user-friendly interface across all devices.
- Implemented front-end design for event information and content updates; managed website hosting and deployment for reliable uptime and performance.
- Worked closely with event organizers to reflect the brand identity.

Freelance Web Developer, FiLLiP Group Jan 2024 - Oct 2026
Kuala Lumpur, Malaysia

- Developed the official company website for Fillip Sdn. Bhd. (fillip-group.com).

E-commerce Business Owner, Shopee and Lazada (ytlin2ndLifeTech) Nov 2017 - Sep 2026
Johor, Malaysia

- Run and organize an online shop selling IT-based components and services.

EDUCATION

Bachelor's Degree, Information Technology (Honours) in Software Systems Development Jun 2023 - Jun 2025
Tunku Abdul Rahman University of Management and Technology (TAR UMT), Johor Branch

- CGPA 3.98; President's List: 202305, 202309, 202401, 202405, 202409

Diploma, Information Technology Jun 2021 - Jun 2023
Tunku Abdul Rahman University College

- CGPA 3.87

AWARDS & COMPETITIONS

- First Runner Up, CodeCraft AI Integration Challenge (CCAIIC) 2024, TAR UMT (30 Nov 2024)
- Second Runner-up, GPT Hero 2025 (Computing Category), TAR UMT Johor Branch (10 May 2025)
- Ispark International Pitching Competition (2024), TAR UMT
- Tech 4 Good Challenge (2024), Vitrox Academy and UTAR

CERTIFICATIONS

- CCNA: Enterprise Networking, Security, and Automation, Cisco Networking Academy
- CCNA: Switching, Routing, and Wireless Essentials, Cisco Networking Academy (2024)
- CCNA: Introduction to Networks, Cisco Networking Academy (2023)
- AWS Academy Graduate: Cloud Architecting, Amazon Web Services Training and Certification
- AWS Academy Cloud Foundations (2024)
- AI Appreciate Badge (AI untuk Rakyat) and AI Aware Certificate, MyDigital and Intel (2024)
